## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 , are drawn to an overlay key , classified in class 257, subclass 123.
- II. Claims 25-48, are drawn to a method classified in class 438, subclass 22

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process namely without the steps of forming an intermediate layer over an entire surface of the wafer and the step of etching the intermediate layer using the second auxiliary overlay pattern as a mask so that the second auxiliary overlay pattern is copied to the intermediate layer.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
